Hostacom TRC 2179N C12334

Polypropylene Compounds

Product Description

Hostacom TRC 2179N is a 12% talc filled PP copolymer, with high flowability, good impact/stiffness balance, high UV resistance and very good scratch resistance. Low emissions and low odor makes it the preferable choice for all kind of interior trim parts. Advanced technologies allow for a significant reduction of mineral filler which contributes to reduction of final part weight. Product is available as a customized color matched, pellet form. This grade is delivered in C12334 color version.

This grade is not intended for medical, pharmaceutical, food and drinking water applications.
