

Hifax TYC735P

Compounded Polyolefin

Product Description

Hifax TYC735P high melt flow, 1,150 MPa flexural modulus, UV-stabilized, paintable, mineral-filled thermoplastic elastomeric olefin (TEO) has an excellent combination of properties and processability. It was designed for use in multiple molded-in color and selectively decorated automotive exterior applications.

A non-UV-stabilized version, TYC735X, is also available for fully painted applications.
