Polypropylene Compounds

Product Description

Hostacom ERC 450N R is a 10% talc filled PP copolymer compound, with superior flowability, low density, excellent scratch resistance, offering low odour and low emissions performances.

Advanced technologies allowed for a significant reduction of mineral filler which contributed to the reduction of final part weight.

This polypropylene compound is produced locally in Russia.

This product is also available in other colors, new colors can be developed depending on customer requirements.

This grade is not intended for medical, pharmaceutical, food and drinking water applications.
