

## Technical Data Sheet

### *Pro-fax* 6301

Polypropylene, Homopolymer

#### Product Description

*Pro-fax* 6301 polypropylene homopolymer is available in spherical particle form. This resin is typically used for mixing with pigments and other additives to make polymer concentrates or masterbatches.

*Pro-fax* 6301 has very minimal stabilization, which allows wide design latitude for compounders. Additional stabilization is required to protect the resin during melt processing and throughout its useful life.

Please note that any additives compounded into this resin will require a re-assessment of its FDA status.

<b>Application</b>	Colour Concentrates; Polymer Modifier; Wood Composites
<b>Market</b>	Compounding
<b>Processing Method</b>	Compounding
<b>Attribute</b>	Dispersible; Good Stiffness; High Filler Loading Capability
