SAFETY DATA SHEET according to GB/T 16483-2008, GB/T	° 17519-2013	lyondellbasell
Hostalen ACP 9255 B		Gen. Variant: SDS CN
Version 1.0 Revision Date 20	020-07-27 Print Date 20	022-01-05 SDS No.: BE33826
1. IDENTIFICATION OF THE SUBSTA	NCE/MIXTURE AND OF TH	E COMPANY/UNDERTAKING
Trade name :	Hostalen ACP 9255 B	
CAS Number: : Chemical characterization :	25087-34-7 Polyethylene copolymer	
Chemical name :	1-Butene, polymer with ethe	
Synonyms :	Ethylene, polymer with 1-bu	tene, Ethene-Butene copolymer
Identified uses :	Manufacture of plastic articl or other conversion process	es by injection molding, extrusion
Prohibited uses :	devices; Health Canada clas	anent implantation into the body;
Company Address Lyondellbasell Polyolefin Shangha Ltd. Room 1406, No 88 Century Avenu Jinmao tower, Pudong District, Sł China.	ai Co., Product Š Switchboa ue,	<u>Telephone</u> afety +852-2585-0120 rd: 86-21-61463500
E-mail address : Responsible/issuing person	product.safety@lyb.com	
2. HAZARDS IDENTIFICATION		
Emergency Overview		
If small particles are generated combustible dust concentration At process temperatures irritati Molten polymer may cause the Slipping hazard if spilled on ha The material can accumulate s	s in air. ng fumes may be produced. rmal burns. rd smooth walking surface.	andling or by other means, may form a source of ignition.
GHS-Classification		
Not a hazardous substance or	mixture according to the Glo	bally Harmonized System (GHS).
GHS-Labeling		
Not a hazardous substance or	mixture according to the Glo	bally Harmonized System (GHS).

Hostalen ACP 9255 B	Gen. Variant: SDS_CN
Version 1.0 Revision Date	2020-07-27 Print Date 2022-01-05 SDS No.: BE33826
In case of skin contact	 If molten material contacts the skin, immediately flush with large amounts of water to cool the affected tissue and polymer. Do not attempt to peel polymer from skin as this will remove the skin. Obtain immediate emergency medical attention if burn is deep or extensive.
In case of eye contact	: Flush eyes thoroughly with water for several minutes and seek medical attention if discomfort persists.
	 In case of eye contact with molten polymer: Continuously flush eye(s) with cool running water for at least 15 minutes. Beyond flushing, DO NOT attempt to remove the material adherent to the eye(s). Immediately seek medical attention.
If swallowed	: Adverse health effects due to ingestion are not anticipated.
Notes to physician	
Symptoms	: Inhalation of process fumes and vapors may cause soreness in the nose and throat and coughing.
Hazards	: Dust contact with the eyes can lead to mechanical irritation. Molten polymer may cause thermal burns.
Treatment	: Treatment of overexposure should be directed at the control of symptoms and the clinical condition of the patient.
5. FIRE-FIGHTING MEASURES	
Suitable extinguishing media	: SMALL FIRE: Use dry chemical, CO2, or water spray.
	: LARGE FIRES: Use water spray hose nozzles from a safe location.
Unsuitable extinguishing media	: None known.
Specific hazards during fire fighting	: Keep away from heat and sources of ignition. In case of fire hazardous decomposition products may be

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Control parameters

Ingredients with workplace control parameters

Revision Date 2020-07-27

Occupational Exposure Limits

Components	CAS-No.	Туре	Limit Value	Basis Revision Date	Additional Information
Materials that can be formed when handling this product: Non- specified (inert or nuisance) dust		TWA	10 mg/m3 inhalable	US (ACGIH) 2005	
Materials that can be formed when handling this product: Non- specified (inert or nuisance) dust		TWA	3 mg/m3 respirable	US (ACGIH) 2005	

Consult local authorities for acceptable exposure limits.

Exposure controls

Engineering measures

Follow the recommendations in NFPA 654 (as amended and adopted) for equipment used to handle this product.

Engineering controls, i.e. enclosed systems, should be used whenever feasible to maintain exposures below acceptable criteria. When such controls are not feasible, or sufficient to achieve full conformance, other engineering controls such as local exhaust ventilation should be used. Equipment and vessels handling combustible dust from this material should be designed to either prevent dust explosions (inerting) or safely vent dust explosions per NFPA 654

Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment).

Personal protective equipment

Respiratory protection	:	Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits.
		When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. Use appropriate respiratory protection where atmosphere

	exceeds recommended limits. Where workers could be exposed to dust concentrations above the exposure limit they must use appropriate certified respirators.
Hand protection	: Wear gloves that provide thermal protection where there is a potential for contact with heated material.
Eye and face protection	: Dust service goggles should be worn to prevent mechanical injury or other irritation to eyes due to airborne particles which may result from handling this product.
Skin and body protection	: Wear suitable protective clothing.
Hygiene measures	 Selection of appropriate personal protective equipment should be based on an evaluation of the performance characteristics of the protective equipment relative to the task(s) to be performed, conditions present, duration of use, and the hazards and/or potential hazards that may be encountered during use. Use good personal hygiene practices. Wash hands before eating, drinking, smoking, or using toilet facilities. Take off contaminated clothing and wash before reuse.

9. PHYSICAL AND CHEMICAL PROPERTIE	S
------------------------------------	---

Appearance Color	: Pellets. : Translucent to white
Odor	: Slight.
Odor Threshold	: No value available.
Flash point	: No Data Available.
Lower explosion limit	: The minimum explosive concentration (MEC) for polymer dust varies according to particle size distribution.
Upper explosion limit	: Not applicable.
Flammability (solid, gas)	: Polymer will burn but does not easily ignite.
Oxidizing properties	: Not considered an oxidizing agent.
Autoignition temperature	: > 300 °C
Decomposition temperature	: not determined
