Petrothene NA217000	Gen. Variant: SDS_US_GHS
Version 1.2 Revision Date	10/01/2019 Print Date 01/05/2022 SDS No.: BE6551
If swallowed	: Adverse health effects due to ingestion are not anticipated.
Notes to physician	
Symptoms	: Inhalation of process fumes and vapors may cause soreness in the nose and throat and coughing.
	the hose and throat and coughing.
Hazards	: Dust contact with the eyes can lead to mechanical irritation.
	Molten polymer may cause thermal burns.
Treatment	: Treatment of overexposure should be directed at the control of symptoms and the clinical condition of the patient.
5. FIRE-FIGHTING MEASURES	
Suitable extinguishing modia	: SMALL FIRE:
Suitable extinguishing media	Use dry chemical, CO2, or water spray.
	: LARGE FIRES:
	Use water spray hose nozzles from a safe location.
Unsuitable extinguishing	: None known.
media Specific hazards during fire	: Keep away from heat and sources of ignition.
fighting	In case of fire hazardous decomposition products may be
	produced such as: Carbon monoxide, carbon dioxide and unburned hydrocarbons
	(smoke).
Special protective equipment	: Wear approved positive pressure self-contained breathing
for fire-fighters	apparatus and firefighter protective clothing.
Further information	: Combustible particulate solid, will decompose under fire
	conditions. Calorific Value: 8000 - 11000 kcal/kg
	Fight fire from safe distance with hose lines or monitor nozzles.
	Heat from fire may melt, decompose polymer, and generate
	flammable vapors. Move containers from fire area if it can be done without risk.
	Evacuate immediately in the event of opening of storage
	container pressure relief devices or discoloration of container. Always stay away from tanks engulfed in fire.
	Do not attempt to get on top of storage containers involved in
	fire.

SAFETY DATA SHEET

Petrothene NA217000

Version 1.2

Revision Date 10/01/2019

Print Date 01/05/2022

Gen. Variant: SDS US GHS

Iyondellbasel

SDS No.: BE6551

Consult local authorities for acceptable exposure limits.

Exposure controls

Engineering measures

Follow the recommendations in NFPA 654 (as amended and adopted) for equipment used to handle this product.

Engineering controls, i.e. enclosed systems, should be used whenever feasible to maintain exposures below acceptable criteria. When such controls are not feasible, or sufficient to achieve full conformance, other engineering controls such as local exhaust ventilation should be used. Equipment and vessels handling combustible dust from this material should be designed to either prevent dust explosions (inerting) or safely vent dust explosions per NFPA 654 Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment).

Personal	protective	equipment
----------	------------	-----------

Respiratory protection	 Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. Use appropriate respiratory protection where atmosphere exceeds recommended limits. Where workers could be exposed to dust concentrations above the exposure limit they must use appropriate certified respirators.
Hand protection	: Wear gloves that provide thermal protection where there is a potential for contact with heated material.
Eye and face protection	: Dust service goggles should be worn to prevent mechanical injury or other irritation to eyes due to airborne particles which may result from handling this product.
Skin and body protection	: Wear suitable protective clothing.
Hygiene measures	 Selection of appropriate personal protective equipment should be based on an evaluation of the performance characteristics of the protective equipment relative to the task(s) to be performed, conditions present, duration of use, and the hazards and/or potential hazards that may be encountered during use. Use good personal hygiene practices. Wash hands before eating, drinking, smoking, or using toilet facilities. Take off contaminated clothing and wash before reuse.
