Variant: SDS US GHS **HF2508** Version 1.0 Revision Date 11/30/2020 Print Date 01/05/2022 SDS No.: BE37319 Notes to physician Symptoms : Inhalation of process fumes and vapors may cause soreness in the nose and throat and coughing. Hazards Dust contact with the eyes can lead to mechanical irritation. Molten polymer may cause thermal burns. Treatment : Treatment of overexposure should be directed at the control of symptoms and the clinical condition of the patient. 5. FIRE-FIGHTING MEASURES Suitable extinguishing media : SMALL FIRE: Use dry chemical, CO2, or water spray. LARGE FIRES: Use water spray hose nozzles from a safe location. Unsuitable extinguishing : None known. media Specific hazards during fire Keep away from heat and sources of ignition. In case of fire hazardous decomposition products may be fighting produced such as: Carbon monoxide, carbon dioxide and unburned hydrocarbons (smoke). Special protective equipment Wear approved positive pressure self-contained breathing apparatus and firefighter protective clothing. for fire-fighters Further information Combustible particulate solid, will decompose under fire conditions. Calorific Value: 8000 - 11000 kcal/kg Fight fire from safe distance with hose lines or monitor nozzles. Heat from fire may melt, decompose polymer, and generate flammable vapors. Move containers from fire area if it can be done without risk. Evacuate immediately in the event of opening of storage container pressure relief devices or discoloration of container. Always stay away from tanks engulfed in fire. Do not attempt to get on top of storage containers involved in fire. Cool storage containers with large volumes of water even after fire is out. 3 / 13

ACCIDENTAL RELEASE MEAS	SURES
Personal precautions	 Equip responders with proper protection. Creates dangerous slipping hazard on any hard smooth surface. Equip emergency responders with proper personal protective
	equipment (PPE) Avoid generating dust.
	Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air).
	Potential combustible dust hazard. Polymer particles create slipping hazard on hard smooth
	surfaces.
Environmental precautions	: Do not flush into surface water or sanitary sewer system.
Methods for containment / Methods for cleaning up	: On land, sweep/shovel into suitable disposal containers or vacuum using equipment which avoids ignition risk.
methods for cleaning up	On water, material is insoluble; collect and contain as any solid.
	All recovered material should be packaged, labeled,
	transported and disposed of or reclaimed in conformance wit applicable laws and regulations and in conformance with goo engineering practices. Reclaim where possible.
Handling and storage	
Precautions for safe handlin	
Advice on safe handling	 Material is in a pellet form. If converted to small particles during further processing, handling, or by other means, may form combustible dust
	concentrations in air. Avoid dust accumulation in enclosed space. Use dust collection systems designed per NFPA 654 to avoid
	dust accumulation. Avoid generating dust; fine dust suspended in air and in the
	presence of an ignition source is a potential dust explosion hazard.
	Static discharge (spark), or other ignition sources, in high due environments may ignite the dust and result in a dust
	explosion Electrostatic charge may build during conveying or handling. Equipment handling polymer should be conductive and
	grounded (earthed) and bonded.

Version 1.0 Revision Date	11/30/2020Print Date 01/05/2022SDS No.: BE37319Metal containers involved in the transfer of this material should be grounded and bonded.All electrical equipment should conform to applicable electric codes and regulatory requirements for areas handling combustible dusts.After handling, always wash hands thoroughly with soap and water.When bringing the material to processing temperatures vapors may develop may condense in the exhaust ventilation. See section 10.Refer to NFPA 654, Standard for the Prevention of Fire and Dust Explosions from the Manufacturing, Processing, and Handling of Combustible Particulate Solids, for safe handling.	
Fire-fighting class	: Polymer will burn but does not easily ignite.	
Conditions for safe storage,	including any incompatibilities	
Requirements for storage areas and containers	 Store in a dry location. Use good housekeeping practices during storage, transferring and handling. Process enclosures and adequate ventilation should be used to avoid excessive dust accumulation. Store away from excessive heat and away from strong oxidizing agents. Keep container closed to prevent contamination. Take measures to prevent the build up of electrostatic charge. 	
Specific end use(s)

Exposure controls

Engineering measures

Follow the recommendations in NFPA 654 (as amended and adopted) for equipment used to handle this product.

Engineering controls, i.e. enclosed systems, should be used whenever feasible to maintain exposures below acceptable criteria. When such controls are not feasible, or sufficient to achieve full conformance, other engineering controls such as local exhaust ventilation should be used. Equipment and vessels handling combustible dust from this material should be designed to either prevent dust explosions (inerting) or safely vent dust explosions per NFPA 654 Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment).

Personal protective equipment

Respiratory protection	 Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. Use appropriate respiratory protection where atmosphere exceeds recommended limits. Where workers could be exposed to dust concentrations above the exposure limit they must use appropriate certified respirators.
Hand protection	: Wear gloves that provide thermal protection where there is a potential for contact with heated material.
Eye and face protection	: Dust service goggles should be worn to prevent mechanical

	injury or other irritation to eyes due to airborne particles which may result from handling this product.
Skin and body protection	: Wear suitable protective clothing.
Hygiene measures	 Selection of appropriate personal protective equipment should be based on an evaluation of the performance characteristics of the protective equipment relative to the task(s) to be performed, conditions present, duration of use, and the hazards and/or potential hazards that may be encountered during use. Use good personal hygiene practices. Wash hands before eating, drinking, smoking, or using toilet facilities. Take off contaminated clothing and wash before reuse.
. PHYSICAL AND CHEMICAL P Appearance Color	ROPERTIES : Pellets. : Translucent to white
Odor	: Slight.
Odor Threshold	: No value available.
Flash point	: No Data Available.
Lower explosion limit	: The minimum explosive concentration (MEC) for polymer due varies according to particle size distribution.
Upper explosion limit	: Not applicable.
Flammability (solid, gas)	: Polymer will burn but does not easily ignite.
Oxidizing properties	: Not considered an oxidizing agent.
Autoignition temperature	: > 300 °C
Decomposition temperature	: not determined
Melting point/range	: 50 - 170 °C
Boiling point/boiling range	: Not applicable.
Vapor pressure	: Not applicable.
Density	: <1 g/cm3
Water solubility	: Insoluble.

Version 1.0

Revision Date 11/30/2020 Print Date 01/05/2022

Gen. Variant: SDS_US_GHS 22 SDS No.: BE37319

Iyondellbase

TSCA 12b

No substances are subject to TSCA 12(b) export notification requirements.

Significant New Use Rules (SNUR)

No substances are subject to a Significant New Use Rule.

SARA 302/304

This product contains no known chemicals regulated under SARA 302/304.

SARA 311/312

Based upon available information, this material is classified as the following health and/or physical hazards according to Section 311 & 312:

Combustible dust

SARA 313

This product contains no known chemicals regulated under SARA 313.

State Reporting

This material does not contain listed substance(s) known to the State of California to cause cancer, birth defects, or other reproductive harm that would require warning under the California Proposition 65 State Drinking Water and Toxic Enforcement Act.

However, LyondellBasell has not tested for the presence of listed chemical substances.

This product contains no known chemicals regulated by New Jersey's Worker and Community Right to Know Act.

No components are subject to the Massachusetts Right to Know Act.

This product contains the following chemicals regulated by Pennsylvania's Right to Know Act:

557-05-1 Zinc Stearate

Other international regulations

Global Inventory Status

The ingredients of this product are compliant with the following chemical inventory requirements or exemptions.

*Additional Explanatory Status Statements follow the table, as necessary.
