	or other conversion process.						
<u>Company Address</u> Basell Asia Pacific Ltd. 32/F, Dorset House Taikoo Place 979 King's Road Quarry Bay, Hong Kong	Company Telephone Product Safety +852-2585-0120 Switchboard +852-2577-3855						
E-mail address : Responsible/issuing person							
2. HAZARDS IDENTIFICATION Emergency Overview							
If small particles are generated during further processing, handling or by other means, may form combustible dust concentrations in air. At process temperatures irritating fumes may be produced. Molten polymer may cause thermal burns. Slipping hazard if spilled on hard smooth walking surface. The material can accumulate static charges which could be a source of ignition.							
GHS-Classification							
Not a hazardous substance or GHS-Labeling	Not a hazardous substance or mixture according to the Globally Harmonized System (GHS). GHS-Labeling						
Not a hazardous substance or mixture according to the Globally Harmonized System (GHS).

Version 1.0 Revision Date 2	
In case of skin contact	 Keep person warm, if necessary give Cardio-Pulmonary Resuscitation (CPR) If molten material contacts the skin, immediately flush with large amounts of water to cool the affected tissue and polymer. Do not attempt to peel polymer from skin as this will remove the skin.
In case of eye contact	 Obtain immediate emergency medical attention if burn is deep or extensive. Flush eyes thoroughly with water for several minutes and seek medical attention if discomfort persists. In case of eye contact with molten polymer: Continuously flush eye(s) with cool running water for at least 15 minutes. Beyond flushing, DO NOT attempt to remove the material
If swallowed	adherent to the eye(s). Immediately seek medical attention. Adverse health effects due to ingestion are not anticipated.
Notes to physician Symptoms	: Inhalation of process fumes and vapors may cause soreness in the nose and throat and coughing.
Hazards	: Dust contact with the eyes can lead to mechanical irritation. Molten polymer may cause thermal burns.
Treatment	: Treatment of overexposure should be directed at the control of symptoms and the clinical condition of the patient.
5. FIRE-FIGHTING MEASURES	
Suitable extinguishing media	 SMALL FIRE: Use dry chemical, CO2, or water spray. LARGE FIRES: Use water spray hose nozzles from a safe location.
Unsuitable extinguishing media	: None known.

Version 1.0 Revision Date	2020-03-03 Print Date 2022-01-05 SDS No.: BE6728			
Specific hazards during fire fighting	 Keep away from heat and sources of ignition. In case of fire hazardous decomposition products may be produced such as: Carbon monoxide, carbon dioxide and unburned hydrocarbons (smoke). 			
	: The formation of hydrocarbons and aldehydes are possible in the initial stages of a fire (especially in between 400 C and 700 C)			
Special protective equipment for fire-fighters	: Wear approved positive pressure self-contained breathing apparatus and firefighter protective clothing.			
Further information	 Combustible particulate solid, will decompose under fire conditions. Calorific Value: 8000 - 11000 kcal/kg Fight fire from safe distance with hose lines or monitor nozzles. Heat from fire may melt, decompose polymer, and generate flammable vapors. Move containers from fire area if it can be done without risk. Evacuate immediately in the event of opening of storage container pressure relief devices or discoloration of container. Always stay away from tanks engulfed in fire. Do not attempt to get on top of storage containers involved in fire. Cool storage containers with large volumes of water even after fire is out. 			
6. ACCIDENTAL RELEASE MEAS	URES			
Personal precautions	 Equip responders with proper protection. Creates dangerous slipping hazard on any hard smooth surface. Equip emergency responders with proper personal protective equipment (PPE) Avoid generating dust. Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air). Potential combustible dust hazard. Polymer particles create slipping hazard on hard smooth surfaces. 			
Environmental precautions	: Do not flush into surface water or sanitary sewer system.			
Methods for containment / Methods for cleaning up	 On land, sweep/shovel into suitable disposal containers or vacuum using equipment which avoids ignition risk. On water, material is insoluble; collect and contain as any solid. All recovered material should be packaged, labeled,

	transported and disposed of or reclaimed in conformance with applicable laws and regulations and in conformance with good engineering practices. Reclaim where possible.					
7. Handling and storage						
Precautions for safe handling						
Advice on safe handling :	handling, or by other means concentrations in air. Avoid dust accumulation in Use dust collection systems dust accumulation. Avoid generating dust; fine presence of an ignition sour hazard. Static discharge (spark), or environments may ignite the explosion Electrostatic charge may bu Equipment handling polyme grounded (earthed) and bor Metal containers involved in should be grounded and bo All electrical equipment sho codes and regulatory requin combustible dusts. After handling, always wash water. When bringing the material may develop may condense section 10. Refer to NFPA 654, Standa Dust Explosions from the M	s designed per NFPA 654 to avoid dust suspended in air and in the rce is a potential dust explosion other ignition sources, in high dust e dust and result in a dust uild during conveying or handling. er should be conductive and nded. In the transfer of this material onded. In the transfer of this material onded.				
Conditions for safe storage, inc	luding any incompatibilitie					
	 Store in a dry location. Use good housekeeping practices during storage, transferring and handling. Process enclosures and adequate ventilation should be used to avoid excessive dust accumulation. Store away from excessive heat and away from strong oxidizing agents. Keep container closed to prevent contamination. Take measures to prevent the build up of electrostatic charge.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION Control parameters						

Ingredients with workplace control parameters

Occupational Exposure Limits

Components	CAS-No.	Туре	Limit Value	Basis Revision Date	Additional Information
Materials that can be formed when handling this product: Non- specified (inert or nuisance) dust		TWA	10 mg/m3 inhalable	US (ACGIH) 2005	
Materials that can be formed when handling this product: Non- specified (inert or nuisance) dust		TWA	3 mg/m3 respirable	US (ACGIH) 2005	

Consult local authorities for acceptable exposure limits.

Exposure controls

Engineering measures

Follow the recommendations in NFPA 654 (as amended and adopted) for equipment used to handle this product.

Engineering controls, i.e. enclosed systems, should be used whenever feasible to maintain exposures below acceptable criteria. When such controls are not feasible, or sufficient to achieve full conformance, other engineering controls such as local exhaust ventilation should be used. Equipment and vessels handling combustible dust from this material should be designed to either prevent dust explosions (inerting) or safely vent dust explosions per NFPA 654

Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment).

Personal protective equipment

Respiratory protection

: Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below
