SDS No.: BE6835

lyondellbasell

2.2 Label elements

Labeling (REGULATION (EC) No 1272/2008)

Revision Date 11/16/2015

Not a hazardous substance or mixture according to Regulation (EC) No 1272/2008.

2.3 Other hazards

If small particles are generated during further processing, handling or by other means, may form combustible dust concentrations in air.

This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT) or very persistent and very bioaccumulative (vPvB).

3. Composition/information on ingredients

3.1 Substances

Ingredients

| Chemical Name | CAS-No. EINECS-No. / ELINCS No./EC-No. | <u>Weight %</u> | Component Type |
|-------------------------------------|--|-----------------|-------------------|
| 1-Butene, polymer with 1-propene | 29160-13-2 | > 99.5 % | |

Contains: Stabilizers

4. First aid measures

4.1 Description of first-aid measures

| General advice | : Take proper precautions to ensure your own health and safety before attempting rescue and providing first aid. |
|-------------------------|--|
| If inhaled | Remove person to fresh air. If signs/symptoms continue, get medical attention. In case of excessive inhalation of fumes that may be generated during heating of this material, move the person to fresh air. Obtain medical attention. Keep person warm, if necessary give Cardio-Pulmonary Resuscitation (CPR) |
| In case of skin contact | If molten material contacts the skin, immediately flush with large amounts of water to cool the affected tissue and polymer. Do not attempt to peel polymer from skin as this will remove the skin. Obtain immediate emergency medical attention if burn is deep |
| | 2/13 |

| | |
| | or extensive. |
| In case of eye contact | : Flush eyes thoroughly with water for several minutes and seek medical attention if discomfort persists. |
| | In case of eye contact with molten polymer: Continuously flush eye(s) with cool running water for at least 15 minutes. Beyond flushing, DO NOT attempt to remove the material adherent to the eye(s). Immediately seek medical attention. |
| If swallowed | : Adverse health effects due to ingestion are not anticipated. |
| 4.2 Most important symptoms an | d effects, both acute and delayed |
| Symptoms | : Inhalation of process fumes and vapors may cause soreness in the nose and throat and coughing. |
| Hazards | : Dust contact with the eyes can lead to mechanical irritation. Molten polymer may cause thermal burns. |
| 4.3 Indication of any immediate n | nedical attention and special treatment needed |
| Treatment | : Treatment of overexposure should be directed at the control of symptoms and the clinical condition of the patient. |
| 5. Fire-fighting measures | |
| 5.1 Extinguishing media | |
| Suitable extinguishing media | : SMALL FIRE: Use dry chemical, CO2, or water spray. |
| | : LARGE FIRES: Use water spray hose nozzles from a safe location. |
| Unsuitable extinguishing media | : None known. |
| 5.2 Special hazards arising from | |
| Specific hazards during fire fighting | Keep away from heat and sources of ignition. In case of fire hazardous decomposition products may be produced such as: Carbon monoxide, carbon dioxide and unburned hydrocarbons (smoke). |
| 5.3 Advice for firefighters | |
| Special protective equipment for fire-fighters | : Wear approved positive pressure self-contained breathing apparatus and firefighter protective clothing. |

| 7. Handling and storage | |
|---|---|
| 7.1 Precautions for safe handlin | g |
| Advice on safe handling | Material is in a pellet form. If converted to small particles during further processing, handling, or by other means, may form combustible dust concentrations in air. Avoid dust accumulation in enclosed space. Avoid generating dust; fine dust suspended in air and in the presence of an ignition source is a potential dust explosion hazard. Static discharge (spark), or other ignition sources, in high dust environments may ignite the dust and result in a dust explosion Electrostatic charge may build during conveying or handling. Equipment handling polymer should be conductive and grounded (earthed) and bonded. Metal containers involved in the transfer of this material should be grounded and bonded. All electrical equipment should conform to applicable electric codes and regulatory requirements for areas handling combustible dusts. After handling, always wash hands thoroughly with soap and water. When bringing the material to processing temperatures vapors may develop may condense in the exhaust ventilation. See section 10. |
| Fire-fighting class | : Polymer will burn but does not easily ignite. |
| 7.2 Conditions for safe storage, | including any incompatibilities |
| Requirements for storage areas and containers | Store in a dry location. Use good housekeeping practices during storage, transferring and handling. Process enclosures and adequate ventilation should be used to avoid excessive dust accumulation. Store away from excessive heat and away from strong oxidizing agents. Keep container closed to prevent contamination. Take measures to prevent the build up of electrostatic charge. |
| 7.3 Specific end use(s) | |
| | : See Section 1.2. |
| | |

8. Exposure controls/personal protection

8.1 Control parameters

Ingredients with workplace control parameters

Occupational Exposure Limits

| Ingredients | CAS-No. | Туре | Limit Value | Basis Revision Date | Additional Information |
|---|---------|------|-----------------------|------------------------|---------------------------|
| Materials that can be formed when handling this product: Non- specified (inert or nuisance) dust | | TWA | 10 mg/m3 inhalable | US (ACGIH) 2005 | |
| Materials that can be formed when handling this product: Non- specified (inert or nuisance) dust | | TWA | 3 mg/m3 respirable | US (ACGIH) 2005 | |

Consult local authorities for acceptable exposure limits.

8.2 Exposure controls

Engineering measures

Follow the recommendations in international standard NFPA 654 (as amended and adopted) for equipment used to handle this product.

Engineering controls, i.e. enclosed systems, should be used whenever feasible to maintain exposures below acceptable criteria. When such controls are not feasible, or sufficient to achieve full conformance, other engineering controls such as local exhaust ventilation should be used. Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment).

Personal protective equipment

| Respiratory protection | Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. Use appropriate respiratory protection where atmosphere exceeds recommended limits. Where workers could be exposed to dust concentrations |

Ponciplastics.com lvondellbasell SAFETY DATA SHEET according to Regulation (EC) No. 1907/2006 Gen. Variant: SDS GB Civrell RC354N Version 1.1 Revision Date 11/16/2015 Print Date 04/14/2017 SDS No.: BE6835 above the exposure limit they must use appropriate certified respirators. Hand protection : Wear gloves that provide thermal protection where there is a potential for contact with heated material. Eye and face protection : Dust service goggles should be worn to prevent mechanical injury or other irritation to eyes due to airborne particles which may result from handling this product. Skin and body protection : Wear suitable protective clothing. Hygiene measures : Selection of appropriate personal protective equipment should be based on an evaluation of the performance characteristics of the protective equipment relative to the task(s) to be performed, conditions present, duration of use, and the hazards and/or potential hazards that may be encountered during use. Use good personal hygiene practices. Wash hands before eating, drinking, smoking, or using toilet facilities. Take off contaminated clothing and wash before reuse. **Environmental exposure controls** General advice : See section 6. 9. Physical and chemical properties 9.1 Information on basic physical and chemical properties : Pellets. Appearance Color Translucent to white Odor : Slight. Lower explosion limit : Note: The minimum explosive concentration (MEC) for polymer dust varies according to particle size distribution. Upper explosion limit : Note: Not applicable. Flammability (solid, gas) : Polymer will burn but does not easily ignite. Oxidizing properties : Not considered an oxidizing agent. : > 300 °C Autoignition temperature : Note: Not applicable. pН 7/13

Disclaimer

Multiple legal entities and registration numbers may be displayed in Section 1. The Recipient shall refer to the shipping documents to identify the legal entity that supplied this product.

This document is generated for the purpose of distributing health, safety, and environmental data.

Information is correct to the best of our knowledge at the date of the SDS publication. It is not a specification sheet nor should any displayed data be construed as a specification. Before using a product sold by a company of the LyondellBasell family of companies, users should make their own independent determination that the product is suitable for the intended use and can be used safely and legally.

SELLER MAKES NO WARRANTY; EXPRESS OR IMPLIED (INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR ANY WARRANTY) OTHER THAN AS SEPARATELY AGREED TO BY THE PARTIES IN A CONTRACT.

Users should review the applicable Safety Data Sheet before handling the product.

This product(s) may not be used in the manufacture of any of the following, without prior written approval by Seller for each specific product and application:

(i) U.S. FDA Class I or II Medical Devices; Health Canada Class I, II or III Medical Devices; European Union Class I or II Medical Devices;

(ii) film, overwrap and/or product packaging that is considered a part or component of one of the aforementioned medical devices;

(iii) packaging in direct contact with a pharmaceutical active ingredient and/or dosage form that is intended for inhalation, injection, intravenous, nasal, ophthalmic (eye), digestive, or topical (skin) administration;

(iv) tobacco related products and applications, electronic cigarettes and similar devices.

The product(s) may not be used in:

(i) U.S. FDA Class III Medical Devices; Health Canada Class IV Medical Devices; European Class III Medical Devices;

(ii) applications involving permanent implantation into the body;

(iii) life-sustaining medical applications.
