No additional information ava	ilable.				
3. COMPOSITION/INFORMATION C	ON INGREDIENTS				
Components					
Chemical name	CAS-No.	Weight %			
Proprietary blend of polyolefinic	Mixture	80.0 - 100.0 %			
polymers					
Contains: Additives, stabilizers	and fillers				
4. FIRST AID MEASURES					
General advice	: Take proper precautions to	ensure your own health and safety			
	before attempting rescue ar				
If inhaled	· Remove person to fresh air	If signs/symptoms continue, get			
	medical attention.				
	In case of excessive inhalation of fumes that may be generated during heating of this material, move the person to fresh air.				
	Obtain medical attention. Keep person warm, if necessary give Cardio-Pulmonary				
Resuscitation (CPR)					
In case of skin contact	: If molten material contacts t	he skin, immediately flush with			
	large amounts of water to cool the affected tissue and polymer. Do not attempt to peel polymer from skin as this will remove th				
	skin. Obtain immediate emergency medical attention if burn is deep				
or extensive.					
In case of eye contact					
in case of eye contact	: Flush eyes thoroughly with water for several minutes and seek medical attention if discomfort persists.				
: In case of eye contact with molten polymer:					
	Continuously flush eye(s) with cool running water for at least minutes.				
	Beyond flushing, DO NOT a adherent to the eye(s).	attempt to remove the material			
	Immediately seek medical a	ttention.			
If swallowed	· Adverse health effects due	to ingestion are not anticipated.			
II SWAIIUWEU		to ingestion are not anticipated.

ersion 1.1 Revision Date	BER
Notes to physician	
Symptoms	: Inhalation of process fumes and vapors may cause soreness the nose and throat and coughing.
Hazards	: Dust contact with the eyes can lead to mechanical irritation. Molten polymer may cause thermal burns.
Treatment	: Treatment of overexposure should be directed at the control symptoms and the clinical condition of the patient.
FIRE-FIGHTING MEASURES	
Suitable extinguishing media	: SMALL FIRE: Use dry chemical, CO2, or water spray.
	: LARGE FIRES: Use water spray hose nozzles from a safe location.
Unsuitable extinguishing media	: None known.
Specific hazards during fire fighting	<ul> <li>Keep away from heat and sources of ignition.</li> <li>In case of fire hazardous decomposition products may be produced such as:</li> <li>Carbon monoxide, carbon dioxide and unburned hydrocarbon (smoke).</li> </ul>
Special protective equipment for fire-fighters	: Wear approved positive pressure self-contained breathing apparatus and firefighter protective clothing.
Further information	<ul> <li>Combustible particulate solid, will decompose under fire conditions.</li> <li>Calorific Value: 8000 - 11000 kcal/kg</li> <li>Fight fire from safe distance with hose lines or monitor nozzle Heat from fire may melt, decompose polymer, and generate flammable vapors.</li> </ul>
	Move containers from fire area if it can be done without risk. Evacuate immediately in the event of opening of storage container pressure relief devices or discoloration of containe Always stay away from tanks engulfed in fire. Do not attempt to get on top of storage containers involved in fire.
	Cool storage containers with large volumes of water even aft fire is out.

Consult local authorities for acceptable exposure limits.

#### Exposure controls

#### Engineering measures

Follow the recommendations in NFPA 654 (as amended and adopted) for equipment used to handle this product.

Engineering controls, i.e. enclosed systems, should be used whenever feasible to maintain exposures below acceptable criteria. When such controls are not feasible, or sufficient to achieve full conformance, other engineering controls such as local exhaust ventilation should be used. Equipment and vessels handling combustible dust from this material should be designed to either prevent dust explosions (inerting) or safely vent dust explosions per NFPA 654 Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment).

#### Personal protective equipment

Respiratory protection	<ul> <li>Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits.</li> <li>When workers are facing concentrations above the exposure limit they must use appropriate certified respirators.</li> <li>Use appropriate respiratory protection where atmosphere exceeds recommended limits.</li> <li>Where workers could be exposed to dust concentrations above the exposure limit they must use appropriate certified respirators.</li> </ul>
Hand protection	: Wear gloves that provide thermal protection where there is a potential for contact with heated material.
Eye and face protection	: Dust service goggles should be worn to prevent mechanical

## **15. REGULATORY INFORMATION**

## TSCA 12b

No substances are subject to TSCA 12(b) export notification requirements.

### Significant New Use Rules (SNUR)

No substances are subject to a Significant New Use Rule.

#### SARA 302/304

This product contains no known chemicals regulated under SARA 302/304.

### SARA 311/312

Based upon available information, this material is classified as the following health and/or physical hazards according to Section 311 & 312:

Combustible dust

#### **SARA 313**

This product contains no known chemicals regulated under SARA 313.

#### State Reporting

This material may contain trace levels of the following chemical substance(s) regulated under California Proposition 65. However, LyondellBasell has not tested for the presence of listed chemical substances. It is the responsibility of the California business owner to develop his or her own regulatory compliance plan. Contact Product Safety for further information at product.safety@lyb.com.
