SAFETY DATA SHEET	lyondellbasel
	I*I_III I
Hifax CA1110 G3 9B9 E Version 1.3 Revision Date	
1. IDENTIFICATION OF THE SUB	STANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING
Trade name	: Hifax CA1110 G3 9B9 BLACK
CAS Number:	: Mixture
Chemical name	: Compounded polyolefin
Synonyms	: Polyolefin, Compounded polymer
Identified uses	: Manufacture of plastic articles by injection molding, extrusion or other conversion process.
Prohibited uses	: FDA Class III medical devices; European class III medical
	devices; Health Canada class IV Medical Devices;
	Applications involving permanent implantation into the body; Life-sustaining medical applications
	3 11
Company Address	Company Telephone
Equistar Chemicals, LP	Customer Service 888 777-0232
LyondellBasell Tower, Suite 3 1221 McKinney St.	00 product.safety@lyb.com
P.O. Box 2583

SAFETY DATA SHEET	(+) 18816996168 Ponciplastics.com	lyondellbasell		
Hifax CA1110 G3 9B9 B Version 1.3 Revision Date 1		Gen. Variant: SDS_US_GHS 5/2022 SDS No.: BE9147		
No additional information ava	ilable.			
3. COMPOSITION/INFORMATION C	ON INGREDIENTS			
Mixtures Components				
Chemical name	CAS-No.	Weight %		
Proprietary blend of polyolefinic polymers	Mixture	80.0 - 100.0 %		
Contains: Additives, stabilizers	and fillers			
General advice	: Take proper precautions to before attempting rescue an	ensure your own health and safety Id providing first aid.		
If inhaled	 Remove person to fresh air. If signs/symptoms continue, get medical attention. In case of excessive inhalation of fumes that may be generated during heating of this material, move the person to fresh air. Obtain medical attention. Keep person warm, if necessary give Cardio-Pulmonary Resuscitation (CPR) 			
In case of skin contact	 If molten material contacts the skin, immediately flush with large amounts of water to cool the affected tissue and polymer. Do not attempt to peel polymer from skin as this will remove the skin. Obtain immediate emergency medical attention if burn is deep or extensive. 			
In case of eye contact	: Flush eyes thoroughly with water for several minutes and seel medical attention if discomfort persists.			
	 In case of eye contact with molten polymer: Continuously flush eye(s) with cool running water for at least minutes. Beyond flushing, DO NOT attempt to remove the material adherent to the eye(s). Immediately seek medical attention. 			
If swallowed	: Adverse health effects due	to ingestion are not anticipated.

Version 1.3 Revision Date	10/01/2019 Print Date 01/06/2022 SDS No.: BE914
Notes to physician	
Symptoms	: Inhalation of process fumes and vapors may cause soreness the nose and throat and coughing.
Hazards	: Dust contact with the eyes can lead to mechanical irritation. Molten polymer may cause thermal burns.
Treatment	: Treatment of overexposure should be directed at the control o symptoms and the clinical condition of the patient.
5. FIRE-FIGHTING MEASURES	
Suitable extinguishing media	: SMALL FIRE: Use dry chemical, CO2, or water spray.
	: LARGE FIRES: Use water spray hose nozzles from a safe location.
Unsuitable extinguishing media	: None known.
Specific hazards during fire fighting	 Keep away from heat and sources of ignition. In case of fire hazardous decomposition products may be produced such as: Carbon monoxide, carbon dioxide and unburned hydrocarbon (smoke).
Special protective equipment for fire-fighters	: Wear approved positive pressure self-contained breathing apparatus and firefighter protective clothing.
Further information	 Combustible particulate solid, will decompose under fire conditions. Calorific Value: 8000 - 11000 kcal/kg Fight fire from safe distance with hose lines or monitor nozzle Heat from fire may melt, decompose polymer, and generate flammable vapors. Move containers from fire area if it can be done without risk. Evacuate immediately in the event of opening of storage container pressure relief devices or discoloration of container. Always stay away from tanks engulfed in fire.
	Do not attempt to get on top of storage containers involved in fire. Cool storage containers with large volumes of water even after fire is out.

ACCIDENTAL RELEASE MEAS	URES			
Personal precautions	: Equip responders with proper protection.			
	Creates dangerous slipping hazard on any hard smooth surface.			
	Equip emergency responders with proper personal protective equipment (PPE)			
	Avoid generating dust. Avoid dispersal of dust in the air (i.e., clearing dust surfaces			
	with compressed air).			
	Potential combustible dust hazard. Polymer particles create slipping hazard on hard smooth			
	surfaces.			
Environmental precautions	: Do not flush into surface water or sanitary sewer system.			
Methods for containment /	: On land, sweep/shovel into suitable disposal containers or vacuum using equipment which avoids ignition risk.			
Methods for cleaning up	On water, material is insoluble; collect and contain as any			
	solid. All recovered material should be packaged, labeled,			
	transported and disposed of or reclaimed in conformance with applicable laws and regulations and in conformance with goo			
	engineering practices. Reclaim where possible.			
Handling and storage				
Precautions for safe handling	-			
Advice on safe handling	 Material is in a pellet form. If converted to small particles during further processing, handling, or by other means, may form combustible dust 			
	concentrations in air.			
	Avoid dust accumulation in enclosed space. Use dust collection systems designed per NFPA 654 to avoid			
	dust accumulation. Avoid generating dust; fine dust suspended in air and in the			
	presence of an ignition source is a potential dust explosion hazard.			
	Static discharge (spark), or other ignition sources, in high due environments may ignite the dust and result in a dust			
	explosion Electrostatic charge may build during conveying or handling. Equipment handling polymer should be conductive and

Consult local authorities for acceptable exposure limits.

Exposure controls

Engineering measures

Follow the recommendations in NFPA 654 (as amended and adopted) for equipment used to handle this product.

Engineering controls, i.e. enclosed systems, should be used whenever feasible to maintain exposures below acceptable criteria. When such controls are not feasible, or sufficient to achieve full conformance, other engineering controls such as local exhaust ventilation should be used. Equipment and vessels handling combustible dust from this material should be designed to either prevent dust explosions (inerting) or safely vent dust explosions per NFPA 654 Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment).

Personal protective equipment

Respiratory protection	 Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. Use appropriate respiratory protection where atmosphere exceeds recommended limits. Where workers could be exposed to dust concentrations above the exposure limit they must use appropriate certified respirators.
Hand protection	: Wear gloves that provide thermal protection where there is a potential for contact with heated material.
Eye and face protection	: Dust service goggles should be worn to prevent mechanical

	injury or other irritation to eyes due to airborne particles which may result from handling this product.
Skin and body protection	: Wear suitable protective clothing.
Hygiene measures	 Selection of appropriate personal protective equipment shoul be based on an evaluation of the performance characteristics of the protective equipment relative to the task(s) to be performed, conditions present, duration of use, and the hazards and/or potential hazards that may be encountered during use. Use good personal hygiene practices. Wash hands before eating, drinking, smoking, or using toilet facilities. Take off contaminated clothing and wash before reuse.

SARA 302/304

This product contains no known chemicals regulated under SARA 302/304.

SARA 311/312

Based upon available information, this material is classified as the following health and/or physical hazards according to Section 311 & 312:

Combustible dust

SARA 313

This product contains no known chemicals regulated under SARA 313.

State Reporting

This material may contain trace levels of the following chemical substance(s) regulated under California Proposition 65. However, LyondellBasell has not tested for the presence of listed chemical substances. It is the responsibility of the California business owner to develop his or her own regulatory compliance plan. Contact Product Safety for further information at product.safety@lyb.com.
