Variant: SDS US GHS Hifax TRC 1230P GXH Black Version 1.0 Revision Date 11/12/2019 Print Date 01/06/2022 SDS No.: BE16862 Notes to physician Symptoms Inhalation of process fumes and vapors may cause soreness in the nose and throat and coughing. Hazards Dust contact with the eyes can lead to mechanical irritation. Molten polymer may cause thermal burns. Treatment Treatment of overexposure should be directed at the control of symptoms and the clinical condition of the patient. 5. FIRE-FIGHTING MEASURES Suitable extinguishing media : SMALL FIRE: Use dry chemical, CO2, or water spray. : LARGE FIRES: Use water spray hose nozzles from a safe location. Unsuitable extinguishing : None known. media Specific hazards during fire Keep away from heat and sources of ignition. In case of fire hazardous decomposition products may be fighting produced such as: Carbon monoxide, carbon dioxide and unburned hydrocarbons (smoke). Special protective equipment Wear approved positive pressure self-contained breathing for fire-fighters apparatus and firefighter protective clothing. Further information Combustible particulate solid, will decompose under fire conditions. Calorific Value: 8000 - 11000 kcal/kg Fight fire from safe distance with hose lines or monitor nozzles. Heat from fire may melt, decompose polymer, and generate flammable vapors. Move containers from fire area if it can be done without risk. Evacuate immediately in the event of opening of storage container pressure relief devices or discoloration of container. Always stay away from tanks engulfed in fire. Do not attempt to get on top of storage containers involved in fire. Cool storage containers with large volumes of water even after fire is out. 3/14

ACCIDENTAL RELEASE MEAS	BURES				
Personal precautions	: Equip responders with proper protection.				
	Creates dangerous slipping hazard on any hard smooth surface.				
	Equip emergency responders with proper personal protective				
	equipment (PPE) Avoid generating dust.				
	Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air).				
	Potential combustible dust hazard.				
	Polymer particles create slipping hazard on hard smooth surfaces.				
Environmental precautions	: Do not flush into surface water or sanitary sewer system.				
Methods for containment /	: On land, sweep/shovel into suitable disposal containers or vacuum using equipment which avoids ignition risk.				
Methods for cleaning up	On water, material is insoluble; collect and contain as any				
	solid. All recovered material should be packaged, labeled,				
	transported and disposed of or reclaimed in conformance with				
	applicable laws and regulations and in conformance with goo engineering practices. Reclaim where possible.				
Handling and storage					
Precautions for safe handlin	ıg				
Advice on safe handling	: Material is in a pellet form. If converted to small particles during further processing,				
	handling, or by other means, may form combustible dust				
	concentrations in air. Avoid dust accumulation in enclosed space.				
	Use dust collection systems designed per NFPA 654 to avoid				
	dust accumulation. Avoid generating dust; fine dust suspended in air and in the				
	presence of an ignition source is a potential dust explosion hazard.				
	Static discharge (spark), or other ignition sources, in high du				
	environments may ignite the dust and result in a dust explosion				
	Electrostatic charge may build during conveying or handling. Equipment handling polymer should be conductive and

Consult local authorities for acceptable exposure limits.

Exposure controls

Engineering measures

Follow the recommendations in NFPA 654 (as amended and adopted) for equipment used to handle this product.

Engineering controls, i.e. enclosed systems, should be used whenever feasible to maintain exposures below acceptable criteria. When such controls are not feasible, or sufficient to achieve full conformance, other engineering controls such as local exhaust ventilation should be used. Equipment and vessels handling combustible dust from this material should be designed to either prevent dust explosions (inerting) or safely vent dust explosions per NFPA 654 Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment).

Personal protective equipment

Respiratory protection	:	Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. Use appropriate respiratory protection where atmosphere exceeds recommended limits. Where workers could be exposed to dust concentrations above the exposure limit they must use appropriate certified respirators.
Hand protection	:	Wear gloves that provide thermal protection where there is a potential for contact with heated material.
Eye and face protection	:	Dust service goggles should be worn to prevent mechanical

TSCA 12b

No substances are subject to TSCA 12(b) export notification requirements.

Significant New Use Rules (SNUR)

No substances are subject to a Significant New Use Rule.

SARA 302/304

This product contains no known chemicals regulated under SARA 302/304.

SARA 311/312

Based upon available information, this material is classified as the following health and/or physical hazards according to Section 311 & 312:

Combustible dust

SARA 313

This product contains no known chemicals regulated under SARA 313.

State Reporting

This material may contain trace levels of the following chemical substance(s) regulated under California Proposition 65. However, LyondellBasell has not tested for the presence of listed chemical substances. It is the responsibility of the California business owner to develop his or her own regulatory compliance plan. Contact Product Safety for further information at product.safety@lyb.com.
