| specified (inert or |     |            |            |  |
| nuisance) dust      |     |            |            |  |

Consult local authorities for acceptable exposure limits.

# Exposure controls

# Engineering measures

Follow the recommendations in NFPA 654 (as amended and adopted) for equipment used to handle this product.

Engineering controls, i.e. enclosed systems, should be used whenever feasible to maintain exposures below acceptable criteria. When such controls are not feasible, or sufficient to achieve full conformance, other engineering controls such as local exhaust ventilation should be used. Equipment and vessels handling combustible dust from this material should be designed to either prevent dust explosions (inerting) or safely vent dust explosions per NFPA 654 Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment).

# Personal protective equipment

| Respiratory protection  | <ul> <li>Use process enclosures, local exhaust ventilation, or other<br/>engineering controls to keep airborne levels below<br/>recommended exposure limits.</li> <li>When workers are facing concentrations above the exposure<br/>limit they must use appropriate certified respirators.</li> <li>Use appropriate respiratory protection where atmosphere<br/>exceeds recommended limits.</li> <li>Where workers could be exposed to dust concentrations<br/>above the exposure limit they must use appropriate certified<br/>respirators.</li> </ul> |
|-------------------------|---|
| Hand protection         | : Wear gloves that provide thermal protection where there is a potential for contact with heated material.  |
| Eye and face protection | : Dust service goggles should be worn to prevent mechanical   |

Iyondellbase

Not regulated for transport

# **15. REGULATORY INFORMATION**

# TSCA 12b

No substances are subject to TSCA 12(b) export notification requirements.

# Significant New Use Rules (SNUR)

No substances are subject to a Significant New Use Rule.

#### SARA 302/304

This product contains no known chemicals regulated under SARA 302/304.

# SARA 311/312

Based upon available information, this material is classified as the following health and/or physical hazards according to Section 311 & 312:

Combustible dust

#### **SARA 313**

This product contains no known chemicals regulated under SARA 313.

#### State Reporting

This material may contain trace levels of the following chemical substance(s) regulated under California Proposition 65. However, LyondellBasell has not tested for the presence of listed chemical substances. It is the responsibility of the California business owner to develop his or her own regulatory compliance plan. Contact Product Safety for further information at product.safety@lyb.com.
