Notes to physician				
Symptoms	: Inhalation of process fumes and vapors may cause soreness i the nose and throat and coughing.			
Hazards	: Dust contact with the eyes can lead to mechanical irritation. Molten polymer may cause thermal burns.			
Treatment	: Treatment of overexposure should be directed at the control o symptoms and the clinical condition of the patient.			
5. FIRE-FIGHTING MEASURES				
Suitable extinguishing media	: SMALL FIRE: Use dry chemical, CO2, or water spray.			
	: LARGE FIRES: Use water spray hose nozzles from a safe location.			
Unsuitable extinguishing media	: None known.			
Specific hazards during fire fighting	<ul> <li>Keep away from heat and sources of ignition. In case of fire hazardous decomposition products may be produced such as: Carbon monoxide, carbon dioxide and unburned hydrocarbons (smoke).</li> </ul>			
Special protective equipment for fire-fighters	: Wear approved positive pressure self-contained breathing apparatus and firefighter protective clothing.			
Further information	<ul> <li>Combustible particulate solid, will decompose under fire conditions.</li> <li>Calorific Value: 8000 - 11000 kcal/kg</li> <li>Fight fire from safe distance with hose lines or monitor nozzle: Heat from fire may melt, decompose polymer, and generate flammable vapors.</li> <li>Move containers from fire area if it can be done without risk. Evacuate immediately in the event of opening of storage</li> </ul>			
	container pressure relief devices or discoloration of container. Always stay away from tanks engulfed in fire. Do not attempt to get on top of storage containers involved in fire.			
	Cool storage containers with large volumes of water even after fire is out.

ACCIDENTAL RELEASE MEASU	URES
Personal precautions	: Equip responders with proper protection.
	Creates dangerous slipping hazard on any hard smooth surface.
	Equip emergency responders with proper personal protective equipment (PPE)
	Avoid generating dust. Avoid dispersal of dust in the air (i.e., clearing dust surfaces
	with compressed air). Potential combustible dust hazard.
	Polymer particles create slipping hazard on hard smooth
	surfaces.
Environmental precautions	: Do not flush into surface water or sanitary sewer system.
Methods for containment /	: On land, sweep/shovel into suitable disposal containers or vacuum using equipment which avoids ignition risk.
Methods for cleaning up	On water, material is insoluble; collect and contain as any
	solid. All recovered material should be packaged, labeled,
	transported and disposed of or reclaimed in conformance with applicable laws and regulations and in conformance with good
	engineering practices. Reclaim where possible.
. Handling and storage	
Precautions for safe handling	-
Advice on safe handling	<ul> <li>Material is in a pellet form.</li> <li>If converted to small particles during further processing, handling, or by other means, may form combustible dust concentrations in air.</li> </ul>
	Avoid dust accumulation in enclosed space. Use dust collection systems designed per NFPA 654 to avoid
	dust accumulation. Avoid generating dust; fine dust suspended in air and in the
	presence of an ignition source is a potential dust explosion
	hazard. Static discharge (spark), or other ignition sources, in high dus environments may ignite the dust and result in a dust
	explosion Electrostatic charge may build during conveying or handling. Equipment handling polymer should be conductive and

Consult local authorities for acceptable exposure limits.

#### **Exposure controls**

#### Engineering measures

Follow the recommendations in NFPA 654 (as amended and adopted) for equipment used to handle this product.

Engineering controls, i.e. enclosed systems, should be used whenever feasible to maintain exposures below acceptable criteria. When such controls are not feasible, or sufficient to achieve full conformance, other engineering controls such as local exhaust ventilation should be used. Equipment and vessels handling combustible dust from this material should be designed to either prevent dust explosions (inerting) or safely vent dust explosions per NFPA 654 Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment).

#### Personal protective equipment

Respiratory protection	<ul> <li>Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits.</li> <li>When workers are facing concentrations above the exposure limit they must use appropriate certified respirators.</li> <li>Use appropriate respiratory protection where atmosphere exceeds recommended limits.</li> <li>Where workers could be exposed to dust concentrations above the exposure limit they must use appropriate certified respirators.</li> </ul>
Hand protection	: Wear gloves that provide thermal protection where there is a potential for contact with heated material.
Eye and face protection	: Dust service goggles should be worn to prevent mechanical injury or other irritation to eyes due to airborne particles which may result from handling this product.

# 9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance Color	: Pellets. : Black
Odor	: Slight.
Odor Threshold	: No value available.
Flash point	: No Data Available.
Lower explosion limit	: The minimum explosive concentration (MEC) for polymer dust varies according to particle size distribution.
Upper explosion limit	: Not applicable.
Flammability (solid, gas)	: Polymer will burn but does not easily ignite.
Oxidizing properties	: Not considered an oxidizing agent.
Autoignition temperature	: > 300 °C
Decomposition temperature	: not determined
Melting point/range	: 50 - 170 °C
Boiling point/boiling range	: Not applicable.
Vapor pressure	: Not applicable.
Density	: > 1 g/cm3
Water solubility	: Insoluble.
Partition coefficient: n-	: No Data Available.

Relative vapor density	: Not applicable.
Evaporation rate	: Not applicable.
Explosive properties	: No Data Available.
Other Information	: No additional information available.
0. STABILITY AND REACTIVITY	(
Reactivity	: No known reactivity hazards.
Chemical stability	: Stable under normal conditions.
Hazardous reactions	: Will not occur.
Conditions to avoid	: Avoid contact with strong oxidizers, excessive heat, sparks or open flame.
Materials to avoid	: Material may be softened by some hydrocarbons.
Hazardous decomposition products	: Not expected to decompose under normal conditions.
Thermal decomposition	: Carbon monoxide, olefinic and paraffinic compounds, trace amounts of organic acids, ketones, aldehydes and alcohols may be formed.
1. TOXICOLOGICAL INFORMA	ΤΙΟΝ
Acute toxicity	
Acute oral toxicity	: Not classified
Acute inhalation toxicity	: Not classified
Acute dermal toxicity	: Not classified
Skin corrosion/irritation	: Not a skin irritant.
Serious eye damage/eye irritation	: Not an eye irritant. Mechanical irritation is possible.

## **15. REGULATORY INFORMATION**

## TSCA 12b

No substances are subject to TSCA 12(b) export notification requirements.

### Significant New Use Rules (SNUR)

No substances are subject to a Significant New Use Rule.

### SARA 302/304

This product contains no known chemicals regulated under SARA 302/304.

### SARA 311/312

Based upon available information, this material is classified as the following health and/or physical hazards according to Section 311 & 312:

Combustible dust

#### **SARA 313**

This product contains no known chemicals regulated under SARA 313.

#### State Reporting

This material may contain trace levels of the following chemical substance(s) regulated under California Proposition 65. However, LyondellBasell has not tested for the presence of listed chemical substances. It is the responsibility of the California business owner to develop his or her own regulatory compliance plan. Contact Product Safety for further information at product.safety@lyb.com.

This product contains the following chemicals regulated by Pennsylvania's Right to Know Act:

14807-96-6 Talc, Magnesium Silicate 1333-86-4 Carbon Black

#### Other international regulations

#### **Global Inventory Status**

The ingredients of this product are compliant with the following chemical inventory requirements or exemptions.

\*Additional Explanatory Status Statements follow the table, as necessary.

Country/Region	Inventory	Status Description
Australia	AICS	Compliant
Canada	DSL	Compliant
China	IECSC	Compliant
Europe	REACH	See REACH Compliance Statement
Japan	ENCS	Compliant
Korea	KECI	Compliant
New Zealand	NZIoC	Compliant
Philippines	PICCS	Compliant
United States of America	TSCA	Compliant
Taiwan	TCSCA	Compliant

#### REACh status

If the product has been purchased from any company of the LyondellBasell group of companies registered in the European Union, we confirm that all substances in this preparation have been registered under REACh, in accordance with the deadlines set forth in REACh. (Regulation (EU) No. 1907/2006)

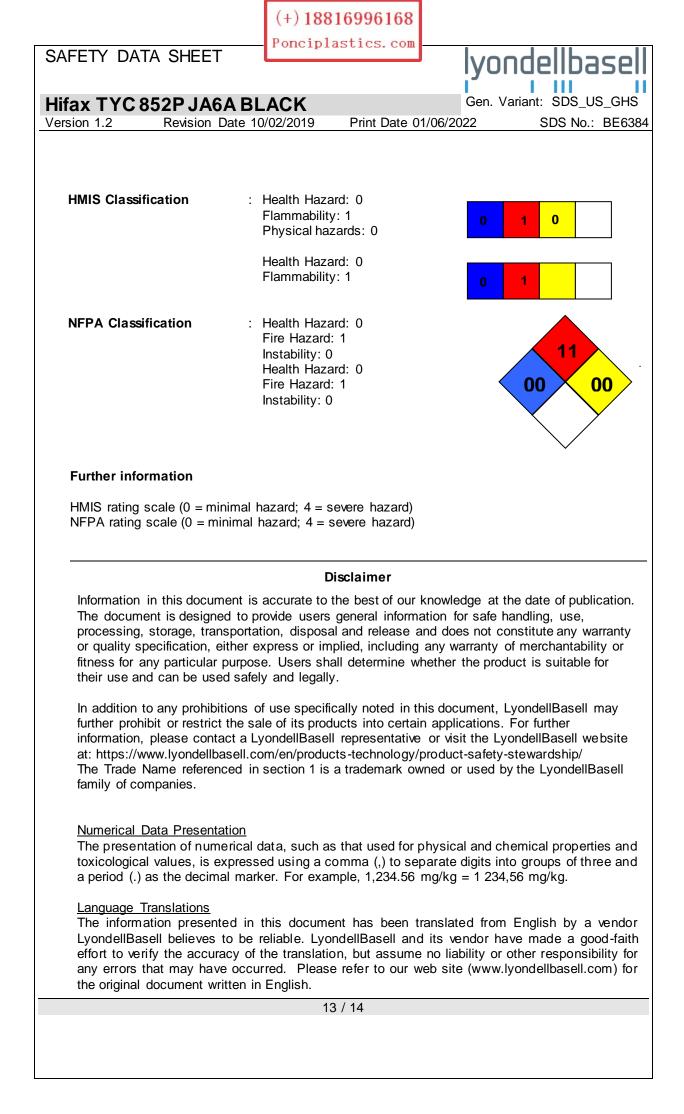

Contact product.safety@lyb.com for additional global inventory information.
