Version 1.2 Revision Date 1	0/02/2019 Print Date 01/06	5/2022 SDS No.: BE5586						
No additional information ava	ilable.							
3. COMPOSITION/INFORMATION C	IN INGREDIENTS							
Components								
Chemical name	CAS-No.	Weight %						
Proprietary blend of polyolefinic polymers	Mixture	80.0 - 100.0 %						
Contains: Additives, stabilizers	and fillers							
4. FIRST AID MEASURES								
General advice	: Take proper precautions to o before attempting rescue an	ensure your own health and safety d providing first aid.						
If inhaled	 Remove person to fresh air. If signs/symptoms continue, get medical attention. In case of excessive inhalation of fumes that may be generated during heating of this material, move the person to fresh air. Obtain medical attention. Keep person warm, if necessary give Cardio-Pulmonary Resuscitation (CPR) 							
In case of skin contact	 If molten material contacts the skin, immediately flush with large amounts of water to cool the affected tissue and polymer. Do not attempt to peel polymer from skin as this will remove the skin. Obtain immediate emergency medical attention if burn is deep or extensive. 							
In case of eye contact	: Flush eyes thoroughly with with medical attention if discomform	water for several minutes and seek ort persists.						
	 In case of eye contact with molten polymer: Continuously flush eye(s) with cool running water for at least 15 minutes. Beyond flushing, DO NOT attempt to remove the material adherent to the eye(s). Immediately seek medical attention. 							
If swallowed	: Adverse health effects due t	o ingestion are not anticipated.

Notes to physician	
Symptoms	: Inhalation of process fumes and vapors may cause soreness the nose and throat and coughing.
Hazards	: Dust contact with the eyes can lead to mechanical irritation. Molten polymer may cause thermal burns.
Treatment	: Treatment of overexposure should be directed at the control o symptoms and the clinical condition of the patient.
5. FIRE-FIGHTING MEASURES	
Suitable extinguishing media	: SMALL FIRE: Use dry chemical, CO2, or water spray.
	: LARGE FIRES: Use water spray hose nozzles from a safe location.
Unsuitable extinguishing media	: None known.
Specific hazards during fire fighting	 Keep away from heat and sources of ignition. In case of fire hazardous decomposition products may be produced such as: Carbon monoxide, carbon dioxide and unburned hydrocarbons
	(smoke).
Special protective equipment for fire-fighters	: Wear approved positive pressure self-contained breathing apparatus and firefighter protective clothing.
Further information	: Combustible particulate solid, will decompose under fire conditions.
	Calorific Value: 8000 - 11000 kcal/kg Fight fire from safe distance with hose lines or monitor nozzle Heat from fire may melt, decompose polymer, and generate flammable vapors.
	Move containers from fire area if it can be done without risk. Evacuate immediately in the event of opening of storage container pressure relief devices or discoloration of container.
	Always stay away from tanks engulfed in fire. Do not attempt to get on top of storage containers involved in fire.
	Cool storage containers with large volumes of water even after fire is out.

Materials that can be formed when handling this product: Non- specified (inert or nuisance) dust		TWA	15 mg/m3 total dust	US (OSHA) 2005	
Materials that can be formed when handling this product: Non- specified (inert or nuisance) dust	-	TWA	5 mg/m3 respirable	US (OSHA) 2005	

Consult local authorities for acceptable exposure limits.

Exposure controls

Engineering measures

Follow the recommendations in NFPA 654 (as amended and adopted) for equipment used to handle this product.

Engineering controls, i.e. enclosed systems, should be used whenever feasible to maintain exposures below acceptable criteria. When such controls are not feasible, or sufficient to achieve full conformance, other engineering controls such as local exhaust ventilation should be used. Equipment and vessels handling combustible dust from this material should be designed to either prevent dust explosions (inerting) or safely vent dust explosions per NFPA 654 Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment).

Personal protective equipment

Respiratory protection	 Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. Use appropriate respiratory protection where atmosphere exceeds recommended limits. Where workers could be exposed to dust concentrations above the exposure limit they must use appropriate certified respirators.
Hand protection	: Wear gloves that provide thermal protection where there is a potential for contact with heated material.
Eye and face protection	: Dust service goggles should be worn to prevent mechanical

	injury or other irritation to eyes due to airborne particles which may result from handling this product.				
Skin and body protection	: Wear suitable protective clothing.				
 Hygiene measures Selection of appropriate personal protective equipment sh be based on an evaluation of the performance characteriss of the protective equipment relative to the task(s) to be performed, conditions present, duration of use, and the hazards and/or potential hazards that may be encountered during use. Use good personal hygiene practices. 					
	Wash hands before eating, drinking, smoking, or using toilet facilities.				
	Take off contaminated clothing and wash before reuse.				
. PHYSICAL AND CHEMICAL PI	ROPERTIES				
Appearance Color	: Pellets. : Black				
Odor	: Slight.				
Odor Threshold	: No value available.				
Flash point	: No Data Available.				
Lower explosion limit	: The minimum explosive concentration (MEC) for polymer du varies according to particle size distribution.				
Upper explosion limit	: Not applicable.				
Flammability (solid, gas)	: Polymer will burn but does not easily ignite.				
Oxidizing properties	: Not considered an oxidizing agent.				
Autoignition temperature	: > 300 °C				
Decomposition temperature	: not determined				
Melting point/range	: 50 - 170 °C				
Boiling point/boiling range	: Not applicable.				
Vapor pressure	: Not applicable.				
Density	: <1 g/cm3				
Water solubility	: Insoluble.
