#### Classification (REGULATION (EC) No 1272/2008)

Revision Date 04/02/2020

Not a hazardous substance or mixture according to Regulation (EC) No 1272/2008.

#### 2.2 Label elements

#### Labeling (REGULATION (EC) No 1272/2008)

Not a hazardous substance or mixture according to Regulation (EC) No 1272/2008.

#### 2.3 Other hazards

If small particles are generated during further processing, handling or by other means, may form combustible dust concentrations in air.

This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT) or very persistent and very bioaccumulative (vPvB).

#### 3. Composition/information on ingredients

#### 3.2 Mixtures

Environmental precautions

Version 1.4

according to Regulation (EC) No. 1907/2006

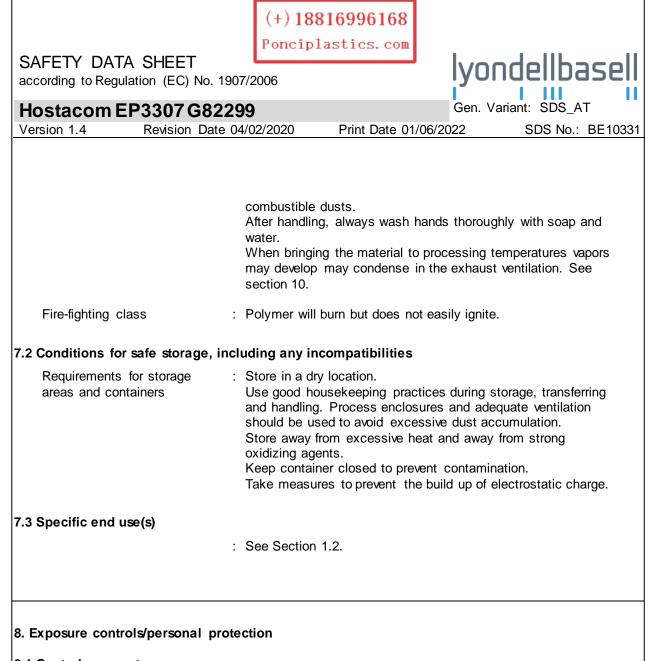

## lyondellbasell Gen. Variant: SDS\_AT Hostacom EP3307 G82299 Revision Date 04/02/2020 Print Date 01/06/2022 SDS No.: BE10331 Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air). Potential combustible dust hazard. Polymer particles create slipping hazard on hard smooth surfaces. 6.2 Environmental precautions : Do not flush into surface water or sanitary sewer system.

#### 6.3 Methods and materials for containment and cleaning up

| Methods for containment / | : On land, sweep/shovel into suitable disposal containers or  |
|---------------------------|---|
| Methods for cleaning up   | vacuum using equipment which avoids ignition risk.  |
|                           | On water, material is insoluble; collect and contain as any solid.  |
|                           | All recovered material should be packaged, labeled,<br>transported and disposed of or reclaimed in conformance with<br>applicable laws and regulations and in conformance with good<br>engineering practices. Reclaim where possible. |

#### 7. Handling and storage

| 7.1 Precautions for safe handling |   |
|-----------------------------------|---|
| Advice on safe handling :         | <ul> <li>Material is in a pellet form.</li> <li>If converted to small particles during further processing, handling, or by other means, may form combustible dust concentrations in air.</li> <li>Avoid dust accumulation in enclosed space.</li> <li>Avoid generating dust; fine dust suspended in air and in the presence of an ignition source is a potential dust explosion hazard.</li> <li>Static discharge (spark), or other ignition sources, in high dust explosion</li> <li>Electrostatic charge may build during conveying or handling.</li> <li>Equipment handling polymer should be conductive and grounded (earthed) and bonded.</li> <li>Metal containers involved in the transfer of this material should be grounded and bonded.</li> <li>All electrical equipment should conform to applicable electric codes and regulatory requirements for areas handling</li> </ul> |
|                                   | 5 / 16  |
|                                   |   |

## SAFETY DATA SHEET

according to Regulation (EC) No. 1907/2006

## Hostacom EP3307 G82299

Version 1.4 Revision Date 04/02/2020 Print Date 01/06/2022 SDS No.: BE10331

| Materials that can be formed when  | TWA | 3 mg/m3<br>respirable | US (ACGIH)<br>2005 |
|------------------------------------|-----|-----------------------|--------------------|
| handling this<br>product: Non-     |     | respirable            | 2005               |
| specified (inert or nuisance) dust |     |                       |                    |

Consult local authorities for acceptable exposure limits.

#### 8.2 Exposure controls

#### Engineering measures

Follow the recommendations in international standard NFPA 654 (as amended and adopted) for equipment used to handle this product.

Engineering controls, i.e. enclosed systems, should be used whenever feasible to maintain exposures below acceptable criteria. When such controls are not feasible, or sufficient to achieve full conformance, other engineering controls such as local exhaust ventilation should be used. Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment).

#### Personal protective equipment

| Respiratory protection   | : | Use process enclosures, local exhaust ventilation, or other<br>engineering controls to keep airborne levels below<br>recommended exposure limits.<br>When workers are facing concentrations above the exposure<br>limit they must use appropriate certified respirators.<br>Use appropriate respiratory protection where atmosphere<br>exceeds recommended limits.<br>Where workers could be exposed to dust concentrations<br>above the exposure limit they must use appropriate certified<br>respirators. |
|--------------------------|---|---|
| Hand protection          | : | Wear gloves that provide thermal protection where there is a potential for contact with heated material.  |
| Eye and face protection  | : | Dust service goggles should be worn to prevent mechanical<br>injury or other irritation to eyes due to airborne particles which<br>may result from handling this product.   |
| Skin and body protection | : | Wear suitable protective clothing.  |

#### **REACh** status

If the product has been purchased from any company of the LyondellBasell group of companies registered in the European Union, we confirm that all substances in this preparation have been registered under REACh, in accordance with the deadlines set forth in REACh. (Regulation (EU) No. 1907/2006)

#### Other international regulations

#### **Global Inventory Status**

The ingredients of this product are compliant with the following chemical inventory requirements or exemptions.

\*Additional Explanatory Status Statements follow the table, as necessary.

| Country/Region           | Inventory | Status Description             |
|--------------------------|-----------|--------------------------------|
| Australia                | AICS      | Compliant                      |
| Canada                   | DSL       | Compliant                      |
| China                    | IECSC     | Compliant                      |
| Europe                   | REACH     | See REACH Compliance Statement |
| Japan                    | ENCS      | Compliant                      |
| Korea                    | KECI      | Compliant                      |
| New Zealand              | NZIoC     | Compliant                      |
| Philippines              | PICCS     | Compliant                      |
| United States of America | TSCA      | Compliant                      |
| Taiwan                   | TCSCA     | Compliant                      |

#### Numerical Data Presentation

The presentation of numerical data, such as that used for physical and chemical properties and toxicological values, is expressed using a comma (,) to separate digits into groups of three and a period (.) as the decimal marker. For example, 1,234.56 mg/kg = 1.234,56 mg/kg.

#### Language Translations

The information presented in this document has been translated from English by a vendor LyondellBasell believes to be reliable. LyondellBasell and its vendor have made a good-faith effort to verify the accuracy of the translation, but assume no liability or other responsibility for any errors that may have occurred. Please refer to our web site (www.lyondellbasell.com) for the original document written in English.
