Moplen RP348T HP

Version 1.2

Revision Date 04/03/2020

Print Date 01/04/2022

SDS No.: BE11928

lyondellbasell

Gen. Variant: SDS AT

2. Hazards identification

2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)

Not a hazardous substance or mixture according to Regulation (EC) No 1272/2008.

2.2 Label elements

Labeling (REGULATION (EC) No 1272/2008)

Not a hazardous substance or mixture according to Regulation (EC) No 1272/2008.

2.3 Other hazards

If small particles are generated during further processing, handling or by other means, may form combustible dust concentrations in air.

This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT) or very persistent and very bioaccumulative (vPvB).

3. Composition/information on ingredients

3.2 Mixtures

Components

Chemical name	CAS-No. EC-No.	Classification (REGULATION (EC) No 1272/2008)	<u>Weight %</u>
1-Propene, Polymer with Ethene	9010-79-1	Not Classified	> 99.5 %

Contains: Additives and stabilizers

4. First aid measures

4.1 Description of first-aid measures

General advice : Take proper precautions to ensure your own health and safety before attempting rescue and providing first aid.

If inhaled

: Remove person to fresh air. If signs/symptoms continue, get

Lawlaw DDA (AT UD

	medical attention. In case of excessive inhalation of fumes that may be generated during heating of this material, move the person to fresh air. Obtain medical attention.		
	Keep person warm, if necessary give Cardio-Pulmonary Resuscitation (CPR)		
In case of skin contact	 If molten material contacts the skin, immediately flush with large amounts of water to cool the affected tissue and polymer. Do not attempt to peel polymer from skin as this will remove the skin. Obtain immediate emergency medical attention if burn is deep or extensive. 		
In case of eye contact	: Flush eyes thoroughly with water for several minutes and seek medical attention if discomfort persists.		
	 In case of eye contact with molten polymer: Continuously flush eye(s) with cool running water for at least 15 minutes. Beyond flushing, DO NOT attempt to remove the material adherent to the eye(s). Immediately seek medical attention. 		
If swallowed	: Adverse health effects due to ingestion are not anticipated.		
Symptoms	and effects, both acute and delayed: Inhalation of process fumes and vapors may cause soreness in the nose and throat and coughing.		
Hazards	: Dust contact with the eyes can lead to mechanical irritation. Molten polymer may cause thermal burns.		
Indication of any immedia	te medical attention and special treatment needed		
Treatment	: Treatment of overexposure should be directed at the control of symptoms and the clinical condition of the patient.		
Fire-fighting measures			
Extinguishing media

SAFETY DATA SHEET according to Regulation (EC) No. 1	(+) 18816996168 Ponciplastics.com 907/2006
Moplen RP348T HP Version 1.2 Revision Date	Gen. Variant: SDS_AT 04/03/2020 Print Date 01/04/2022 SDS No.: BE11928
Suitable extinguishing media	 SMALL FIRE: Use dry chemical, CO2, or water spray. LARGE FIRES:
Unsuitable extinguishing media	Use water spray hose nozzles from a safe location. : None known.
5.2 Special hazards arising from t	he substance or mixture
Specific hazards during fire fighting	 Keep away from heat and sources of ignition. In case of fire hazardous decomposition products may be produced such as: Carbon monoxide, carbon dioxide and unburned hydrocarbons (smoke).
5.3 Advice for firefighters	
Special protective equipment for fire-fighters	: Wear approved positive pressure self-contained breathing apparatus and firefighter protective clothing.
Further information	 Combustible particulate solid, will decompose under fire conditions. Calorific Value: 8000 - 11000 kcal/kg Fight fire from safe distance with hose lines or monitor nozzles. Heat from fire may melt, decompose polymer, and generate flammable vapors. Move containers from fire area if it can be done without risk. Evacuate immediately in the event of opening of storage container pressure relief devices or discoloration of container. Always stay away from tanks engulfed in fire. Do not attempt to get on top of storage containers involved in fire. Cool storage containers with large volumes of water even after fire is out.
6. Accidental release measures	
6.1 Personal precautions, protect	ve equipment and emergency procedures
Personal precautions	: Equip responders with proper protection. Creates dangerous slipping hazard on any hard smooth surface.
	4 / 16

SAFETY DATA SHEET	(+) 18816996168 Ponciplastics.com
according to Regulation (EC) No. 190	
Moplen RP348T HP Version 1.2 Revision Date 0	Gen. Variant: SDS_AT 04/03/2020 Print Date 01/04/2022 SDS No.: BE11928
	Equip emergency responders with proper personal protective equipment (PPE) Avoid generating dust. Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air). Potential combustible dust hazard. Polymer particles create slipping hazard on hard smooth surfaces.
6.2 Environmental precautions	
Environmental precautions :	Do not flush into surface water or sanitary sewer system.
6.3 Methods and materials for conta	ainment and cleaning up
Methods for containment / : Methods for cleaning up	 On land, sweep/shovel into suitable disposal containers or vacuum using equipment which avoids ignition risk. On water, material is insoluble; collect and contain as any solid. All recovered material should be packaged, labeled, transported and disposed of or reclaimed in conformance with applicable laws and regulations and in conformance with good engineering practices. Reclaim where possible.
7. Handling and storage	
7.1 Precautions for safe handling Advice on safe handling :	 Material is in a pellet form. If converted to small particles during further processing, handling, or by other means, may form combustible dust concentrations in air. Avoid dust accumulation in enclosed space. Avoid generating dust; fine dust suspended in air and in the presence of an ignition source is a potential dust explosion hazard. Static discharge (spark), or other ignition sources, in high dust environments may ignite the dust and result in a dust explosion Electrostatic charge may build during conveying or handling. Equipment handling polymer should be conductive and grounded (earthed) and bonded. Metal containers involved in the transfer of this material

Materials that can be formed when handling this product: Non- specified (inert or nuisance) dust	TWA	10 mg/m3 inhalable	US (ACGIH) 2005	
Materials that can be formed when handling this product: Non- specified (inert or nuisance) dust	TWA	3 mg/m3 respirable	US (ACGIH) 2005	

Consult local authorities for acceptable exposure limits.

8.2 Exposure controls

Engineering measures

Follow the recommendations in international standard NFPA 654 (as amended and adopted) for equipment used to handle this product.

Engineering controls, i.e. enclosed systems, should be used whenever feasible to maintain exposures below acceptable criteria. When such controls are not feasible, or sufficient to achieve full conformance, other engineering controls such as local exhaust ventilation should be used. Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment).

Personal protective equipment

Respiratory protection	 Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. Use appropriate respiratory protection where atmosphere exceeds recommended limits. Where workers could be exposed to dust concentrations above the exposure limit they must use appropriate certified respirators.
Hand protection	: Wear gloves that provide thermal protection where there is a potential for contact with heated material.
