Resin Identification	PA66-LGF40	ISO 1043
Part Marking Code	>PA66-LGF40<	ISO 11469

Typical mechanical properties

Tensile modulus	13400	MPa	ISO 527-1/-2
Tensile stress at break, 5mm/min	225	MPa	ISO 527-1/-2
Tensile strain at break, 5mm/min	2	%	ISO 527-1/-2
Flexural modulus	11600	MPa	ISO 178
Flexural strength	360	MPa	ISO 178
Flexural strain at failure	4.1	%	ISO 178
Charpy impact strength, 23°C	95	kJ/m²	ISO 179/1eU
Charpy impact strength, -30°C		kJ/m²	ISO 179/1eU
Charpy notched impact strength, 23°C		kJ/m²	ISO 179/1eA
Charpy notched impact strength, -30°C	26	kJ/m²	ISO 179/1eA
Puncture energy, 23°C		J	ISO 6603-2
Puncture energy, -30°C	17.8	J	ISO 6603-2
Izod notched impact strength, 23°C	37	kJ/m²	ISO 180/1A
Izod impact strength, 23°C	47	kJ/m²	ISO 180/1U
Izod impact strength, -30°C		kJ/m²	ISO 180/1U
Izod impact strength, -40°C		kJ/m²	ISO 180/1U
Poisson's ratio	0.33 ^[C]		
[C]: Calculated			

Thermal properties

Melting temperature, 10°C/min	261 °C	ISO 11357-1/-3
Temperature of deflection under load, 1.8 MPa	255 °C	ISO 75-1/-2
Temperature of deflection under load, 8 MPa	240 °C	ISO 75-1/-2

Physical/Other properties

Density	1450 kg/m ³	ISO 1183
_ 0.1011		

Injection

Drying Recommended	yes	
Drying Temperature	80	°C
Drying Time, Dehumidified Dryer	2 - 4	h
Processing Moisture Content	≤0.2	%
Melt Temperature Optimum	295	°C
Min. melt temperature	285	°C
Max. melt temperature	305	°C
Screw tangential speed	≤0.2	m/s
Mold Temperature Optimum	100	°C
Min. mould temperature	70	°C
Max. mould temperature	120	°C
Hold pressure range	50 - 100	MPa

CELSTRAN® PA66-GF40-02-NATURAL CELSTRAN® Long Fibre

Characteristics

Processing Injection Moulding

Delivery form Pellets

Special characteristics Heat stabilised or stable to heat

Additional information

Injection molding Preprocessing

PA6&PA66 drying requirements: 4 hrs. @80° C. A dehumidifier or desiccant dryer is recommended.

Processing

Celstran can be processed on a standard injection molding unit. A general purpose metering screw is recommended with a zone distribution of 40% feed, 40% transition, and 20% metering. A free flowing check ring assembly is recommended.

Melt Temp: 295-300 °C. Mold Temp: 85-95 °C.

Processing Notes Pre-Drying

CELSTRAN PA should in principle be predried. Because of the necessary low maximum residual moisture content the use of dry air dryers is recommended. The dew point should be =< -30 °C. The time between drying and processing should be as short as possible.

Storage

Note: Material can be over dried and may discolor.

NOTICE TO USERS: Values shown are based on testing of laboratory test specimens and represent data that fall within the standard range of properties for natural material. These values alone do not represent a sufficient basis for any part design and are not intended for use in establishing maximum, minimum, or ranges of values for specification purposes. Colourants or other additives may cause significant variations in data values. Properties of moulded parts can be influenced by a wide variety of factors including, but not limited to, material selection, additives, part design, processing conditions and environmental exposure. Other than those products expressly identified as medical grade (including by MT® product designation or otherwise), Celanese's products are not intended for use in medical or dental implants. Regardless of any such product designation, any determination of the suitability of a particular material and part design for any use contemplated by the users and the manner of such use is the sole responsibility of the users, who must assure themselves that the material as subsequently processed meets the needs of their particular product or use. To the best of our knowledge, the information contained in this publication is accurate; however, we do not assume any liability whatsoever for the accuracy and completeness of such information. The information contained in this publication should not be construed as a promise or guarantee of specific properties of our products. It is the sole responsibility of the users to investigate whether any existing patents are infringed by the use of the materials mentioned in this publication. Moreover, there is a need to reduce human exposure to many materials to the lowest practical limits in view of possible adverse effects. To the extent that any hazards may have been mentioned in this publication, we neither suggest nor guarantee that such hazards are the only ones that exist. We recommend that persons intending to rely on any recommendation or to use any e
