

# CELCON® TX-11HK

# **CELCON®**

A medium-high viscosity grade for general injection molding. It is suitable for use requiring reduced wear noise and a good friction and wear resistance without sacrificing mechanical properties.

#### **Product information**

Resin Identification	POM	ISO 1043
Part Marking Code	>POM<	ISO 11469

## Rheological properties

Melt mass-flow rate	6 g/10mir	n ISO 1133
Melt mass-flow rate, Temperature	190 °C	
Melt mass-flow rate, Load	2.16 kg	
Moulding shrinkage, parallel	2.0 %	ISO 294-4, 2577

# Typical mechanical properties

Tensile stress at yield, 50mm/min	66 MPa	ISO 527-1/-2
Nominal strain at break	43 %	ISO 527-1/-2
Flexural modulus	2550 MPa	ISO 178
Flexural strength	86 MPa	ISO 178
Charpy notched impact strength, 23°C	7.5 kJ/m <sup>2</sup>	ISO 179/1eA

# **Electrical properties**

Volume resistivity	1E12 Ohm.m	IEC 62631-3-1
Surface resistivity	1E16 Ohm	IEC 62631-3-2

## Physical/Other properties

Density	1400 kg/m <sup>3</sup>	ISO 1183
Density	1400 kg/III	130 11

#### Injection

Drying Recommended	no
Drying Temperature	100 °C
Drying Time, Dehumidified Dryer	3-4 h
Processing Moisture Content	≤0.2 %
Melt Temperature Optimum	195 °C
Min. melt temperature	180 °C
Max. melt temperature	210 °C
Screw tangential speed	≤0.3 m/s
Mold Temperature Optimum	70 °C
Min. mould temperature	60 °C
Max. mould temperature	80 °C
Hold pressure range	60 - 120 MPa

#### Characteristics

Processing Injection Moulding

Delivery form Pellets

Special characteristics Low wear / Low friction

NOTICE TO USERS: Values shown are based on testing of laboratory test specimens and represent data that fall within the standard range of properties for natural material. These values alone do not represent a sufficient basis for any part design and are not intended for use in establishing maximum, minimum, or ranges of values for specification purposes. Colourants or other additives may cause significant variations in data values. Properties of moulded parts can be influenced by a wide variety of factors including, but not limited to, material selection, additives, part design, processing conditions and environmental exposure. Other than those products expressly identified as medical grade (including by MT® product designation or otherwise), Celanese's products are not intended for use in medical or dental implants. Regardless of any such product designation, any determination of the suitability of a particular material and part design for any use contemplated by the users and the manner of such use is the sole responsibility of the users, who must assure themselves that the material as subsequently processed meets the needs of their particular product or use. To the best of our knowledge, the information contained in this publication is accurate; however, we do not assume any liability whatsoever for the accuracy and completeness of such information. The information contained in this publication should not be construed as a promise or guarantee of specific properties of our products. It is the sole responsibility of the users to investigate whether any existing patents are infringed by the use of the materials mentioned in this publication. Moreover, there is a need to reduce human exposure to many materials to the lowest practical limits in view of possible adverse effects. To the extent that any hazards may have been mentioned in this publication, we neither suggest nor guarantee that such hazards are the only ones that exist. We recommend that persons intending to rely on any recommendation or to use any e
