

CELSTRAN® ROVING FV VERGINE MS500 CELSTRAN® Long Fibre

This material is glass fibre roving 99% - E-glass type StarRov® 2400 tex. Material is generated from the remaining glass bobbins after LFT production runs.

Glass rovings are made of several single glass filaments with diameter of 14 -20 micron.

Composition:

>=99% E-Glass;

<=1% glass sizing for polypropylene.

Material storage:

Glass fibre products must remain in packaging material until just prior to its use. It is recommended to bring material in the workshop place 24 hours at least prior use. Optimal atmospheric processing conditions are: temperature between 20-22 °C and relative humidity between 60-65%.

Product information

Resin Identification PP-GF99 ISO 1043
Part Marking Code >PP-GF99< ISO 11469

Physical/Other properties

Density 1750 kg/m³ ISO 1183

Printed: 2025-05-30 Page: 1 of 1

Revised: 2025-02-11 Source: Celanese Materials Database

NOTICE TO USERS: Values shown are based on testing of laboratory test specimens and represent data that fall within the standard range of properties for natural material. These values alone do not represent a sufficient basis for any part design and are not intended for use in establishing maximum, minimum, or ranges of values for specification purposes. Colourants or other additives may cause significant variations in data values. Properties of moulded parts can be influenced by a wide variety of factors including, but not limited to, material selection, additives, part design, processing conditions and environmental exposure. Other than those products expressly identified as medical grade (including by MT® product designation or otherwise), Celanese's products are not intended for use in medical or dental implants. Regardless of any such product designation, any determination of the suitability of a particular material and part design for any use contemplated by the users and the manner of such use is the sole responsibility of the users, who must assure themselves that the material as subsequently processed meets the needs of their particular product or use. To the best of our knowledge, the information contained in this publication is accurate; however, we do not assume any liability whatsoever for the accuracy and completeness of such information. The information contained in this publication should not be construed as a promise or guarantee of specific properties of our products. It is the sole responsibility of the users to investigate whether any existing patents are infringed by the use of the materials mentioned in this publication. Moreover, there is a need to reduce human exposure to many materials to the lowest practical limits in view of possible adverse effects. To the extent that any hazards may have been mentioned in this publication, we neither suggest nor guarantee that such hazards are the only ones that exist. We recommend that persons intending to rely on any recommendation or to use any e
