
RITEFLEX® 100CB - TPC

Description

Riteflex 100CB is a carbon black masterbatch concentrate designed to provide black color to natural Riteflex TPC-ET grades. Typical let-down ratio is 1:40. Riteflex 100CB can be added to natural Riteflex TPC-ET grades with or without other Riteflex masterbatches like Riteflex 102UV and/or Riteflex 102HS. Riteflex masterbatches are specially designed to provide certain features to natural Riteflex grades with minimal effect on performance properties. Riteflex masterbatches should be blended with Riteflex natural grades prior to use - they are not intended to be used directly for manufacturing of parts.
