

SANTOPRENE[®] 591-65W175

SANTOPRENE®

Santoprene® 591-65W175 is a soft, black thermoplastic vulcanizate (TPV) in the thermoplastic elastomer (TPE) family. This material is designed for thin wall, architectural glazing and sealing applications in industry and consumer segments. This grade of Santoprene® TPV is shear-dependent and can be processed on conventional thermoplastics equipment for extrusion, thermoforming. It is polyolefin based and completely recyclable.

Key Features

- · Recommended for glazing and sealing applications in industry and consumer segments.
- · Excellent resistance to compression set.

• Designed for extruding thin sections with excellent definition (down to 0.33 mm [0.013"] radius). Long runs with minimal build-up of material on screen packs or narrow sections die sections.

Product information

Resin Identification	TPV		ISO 1043
Part Marking Code	>TPV<		ISO 11469
Typical mechanical properties			
Tensile stress at 100% elongation, perpendicular	2.94	MPa	ISO 37
Tensile stress at break, perpendicular	7.03	MPa	ISO 527-1/-2 or ISO 37
Elongation at break, perpendicular	439	%	ISO 527-1/-2 or ISO 37
Shore A hardness, 15s	73		ISO 48-4 / ISO 868
Compression set, 70°C, 24h	31	%	ISO 815
Compression set, 125°C, 70h	45	%	ISO 815
Physical/Other properties			
Density	987	kg/m ³	ISO 1183

Characteristics

Processing	$\label{eq:extrusion} \mbox{ Extrusion, Coextrusion, Thermoforming}$
Delivery form	Pellets

Additional information

Non Standard Data

Property Name	Condition	Value	Unit	Standard
Change in Tensile Strength	150°C, 168h	-6.4	%	ISO 188
Change in Tensile Strain at Break	150°C, 168h	-4.7	%	ISO 188
Change in Shore A Hardness	150°C, 168h	0.3	-	ISO 188

Injection molding

Holding pressure should be about 50 to 75% of the actual injection pressure.

SANTOPRENE[®] 591-65W175

SANTOPRENE®

A high screw RPM (100 to 200) is recommended. Back pressure is not always needed, however, a back pressure of 0.3 to 0.7 MPa may be used to ensure a homogeneous melt and maintain a consistent shot size. A higher back pressure is normally employed when using masterbatches.

Processing Notes

Processing Notes

Desiccant drying for 3 hours at 80° C (180° F) is recommended. Santoprene® TPV has a wide temperature processing window from 175 to 230° C (350 to 450° F) and is incompatible with acetal and PVC. Do not exceed 15% drawdown.

NOTICE TO USERS: Values shown are based on testing of laboratory test specimens and represent data that fall within the standard range of properties for natural material. These values alone do not represent a sufficient basis for any part design and are not intended for use in establishing maximum, minimum, or ranges of values for specification purposes. Colourants or other additives may cause significant variations in data values. Properties of moulded parts can be influenced by a wide variety of factors including, but not limited to, material selection, additives, part design for any use contemplated by a motical grade (including by MT® product designation or otherwise), Celanese's products are not intended for use in medical or dental implants. Regardless of any such product designation, any determination of the suitability of a particular material and part design for any use contemplated by the users and the manner of such use is the sole responsibility of the users, who must assure themselves that the material as subsequently processed meets the needs of their particular product or use. To the best of our knowledge, the information contained in this publication is accurate; however, we do not assume any liability whatsoever for the accuracy and completeness of such information. The information contained in this publication as a promise or guarantee of specific properties of our products. It is the sole responsibility of the users to investigate whether any existing patents are infringed by the use of the materials mentioned in this publication. Moreover, there is a need to reduce human exposure to many materials to he lowest that texist. We recommend that persons intending to rely on any recommendation or to use any equipment, processing technique or material mentioned in this publication should satisfy themselves that they can meet all applicable safety and health standards. We strongly recommend that users seek and adhere to the manufacturer's current instructions for handling each material they use, and
